

Create REST API Info

API details

- ☒ **New API**
Create a new REST API.
- ☐ **Clone existing API**
Create a copy of an API in this AWS account.
- ☐ **Import API**
Import an API from an OpenAPI definition.
- ☐ **Example API**
Learn about API Gateway with an example API.

API name

facial-recognition-api

Description - optional

API endpoint type

Regional APIs are deployed in the current AWS Region. Edge-optimized APIs route requests to the nearest CloudFront Point of Presence. Private APIs are only accessible from VPCs.

Regional ▼

Security policy - new Info

Transport Layer Security (TLS) protects data in transit between a client and server. The security policy also determines the cipher suite options that clients can use with your API.

Choose a security policy ▼

IP address type Info

Select the type of IP addresses that can invoke the default endpoint for your API.

- ☒ **IPv4**
Supports only edge-optimized and Regional API endpoint types.
- ☐ **Dualstack**
Supports all API endpoint types.

POST

Integration type

- ☒ **Lambda function**
Integrate your API with a Lambda function.

- ☐ **HTTP**
Integrate with an existing HTTP endpoint.

- ☐ **Mock**
Generate a response based on API Gateway mappings and transformations.

- ☐ **AWS service**
Integrate with an AWS Service.

- ☐ **VPC link**
Integrate with a resource that isn't accessible over the public internet.

- ☒ **Lambda proxy integration**
Send the request to your Lambda function as a structured event.

Response transfer mode [Info](#)

- ☒ **Buffered**
Wait to receive the complete response before beginning transmission.
- ☐ **Stream**
Send portions of the response without waiting for the complete response.
You can only change the response transfer mode for proxy integrations.

Lambda function

Provide the Lambda function name or alias. You can also provide an ARN from another account.

eu-west-1

 arn:aws:lambda:eu-west-1:009850210027:function:employee-authentication

-  **Grant API Gateway permission to invoke your Lambda function**
When you save your changes, API Gateway updates your Lambda function's resource-based policy to allow this API to invoke it.

Integration timeout [Info](#)

By default, you can enter an integration timeout of 50 - 29,000 milliseconds. You can use Service Quotas to raise the integration timeout to greater than 29,000 ms

29000

Create usage plan

Usage plan details

Usage plans specify the number or rate of requests that your API accepts from a client. Associate an API key with a usage plan to track the requests your API receives.

Name

facial-recognition-sam

Description - optional

Throttling

Limit the rate that users can call your API.

Rate

100

Burst

1000

Quota

Turn on quotas to limit the number of requests a user can make to your API in a given time period.

Requests

Enter the total number of requests that a user can make in the time period you select in the dropdown list.
